PROFESSIONAL SUMMARY

QA Engineer with 3 years at Findo Group: one year in QA testing and Flutter development, after two years as a data entry specialist. I test Flutter mobile apps (iOS and Android) and web platforms before every release, design test cases, write clear bug reports and run regression testing until each issue is closed. I built my own Playwright tool that runs 20 automated test suites on any website. Strong in Arabic localization, right-to-left layouts and AI feature testing, with a solid data background in Excel, SQL and Python. Available immediately for remote work.

EXPERIENCE

QA Tester & Flutter Developer, Findo Group Oct 2025 - Present
Remote, full-time

- Test Flutter mobile apps on iOS and Android (Xcode Simulator, Android emulator and real devices) and web platforms before every release.
- Wrote 7 structured QA reports (July - September 2026) covering 5 web and mobile products and 69 issues, each with steps to reproduce, expected vs. actual results, severity and screenshots.
- Products tested include a rental marketplace app, a clinic management system, an e-learning platform, a national online auctions platform and an AI assistant website.
- Log, prioritize and track issues in Jira, re-test fixes and run regression checks on every new build until each issue is closed.
- Check Arabic localization, right-to-left layouts and AI feature responses; for example, found an AI assistant answering in English when Arabic was selected.
- Review iOS and Android builds against App Store and Google Play guidelines before submission and help resolve review rejections.
- Build and fix Flutter features and API integrations alongside testing, and use AI tools (Claude Code, ChatGPT, Gemini) to draft test cases faster.

Data Entry & SEO Specialist, Findo Group Oct 2023 - Oct 2025
Remote, full-time

- Entered and maintained company and client records in Arabic and English, checked data against sources and fixed errors and duplicates.
- Prepared reports and spreadsheets in Excel, Word and PowerPoint, and used SQL to look up and update records.
- Managed a women's footwear e-commerce client for about a year: product data entry, SEO articles and search optimization on WordPress.

PROJECTS

QA Pro, Automated Website Testing Tool 2026
Personal project, Electron + Playwright

- Built a desktop app that opens any website, runs 20 automated test suites (links, forms, layout, performance and more) and produces a report of the problems found.

QA Bug Tracker 2026

- Built an HTML bug tracking tool with an Excel template for logging issues, severity, status and re-test results.

QA Reports Portfolio 2026
Published on my portfolio website

- Selected QA reports for web and mobile products, showing my test approach, bug report format and severity ratings.

SKILLS

Testing: manual, functional, regression, smoke, sanity, exploratory and UI testing; test case design; test scenarios; bug reporting and tracking; severity and priority; SDLC and STLC; localization and RTL testing; AI feature testing
Automation & Code: Playwright (JavaScript), Python (data types, lists, dictionaries, loops, functions, scripts), Flutter / Dart, HTML, CSS, JavaScript, Git basics
Platforms: iOS and Android (Xcode Simulator, Android emulator, real devices), web browsers, App Store and Google Play review guidelines
Tools: Jira, Microsoft Excel, SQL, Power BI, Word, PowerPoint, WordPress, Claude, Claude Code, ChatGPT, Gemini

EDUCATION

B.A. in Geography, Surveying and GIS Division 2022 - 2026
Faculty of Arts, Damanhur University | Grade: Very Good | Ranked 3rd in the faculty | Graduation project awarded a certificate of appreciation for excellence

CERTIFICATES

- Claude 101, Anthropic (Jul 2026)
- AutoCAD certificate, officially stamped
- Surveying software (Sokkia Link, Surfer, AutoCAD, Civil 3D), Misr Public Library, Damanhour (2024 - 2025), Very Good

Languages: Arabic (native), English (intermediate, working proficiency) | **Availability:** immediately, remote, full-time, shifts accepted
